

KODO for CLOUD 4.0

Microsoft Office 365 backup and recovery solution

Introduction

KODO for CLOUD provides smart backup solutions and recovery services for Microsoft Office 365: Exchange Online and OneDrive for Business.

KODO for Cloud 4.0 is a major release adding support storing Office 365 backup repository on the filesystem.

In addition, we made a lot of effort to make your backup & recovery process faster and simpler to manage and maintain.

Option to add multiple agents, ability to process concurrent Office 365 accounts, Office 365 throttling & resource limits outage control makes KODO for Cloud an excellent opportunity for any organization, which plan to keep Office 365 backup data on-premise.
