

Storware and Zadara Join Forces to Deliver Secure and Scalable Compute-as-a-Service

WARSAW, POLAND – March 27, 2025 – Storware, European data backup and recovery system vendor, today announced a new partnership with Zadara, the sovereign AI edge cloud leader. Storware has expanded its portfolio with its 7.2 release of Backup and Recovery, adding Zadara to provide elastic compute management, scalability and resource customization. Together, Storware and Zadara are creating solutions further enhancing data protection for cloud computing services.

This significant step will empower organizations to enhance their cloud computing capabilities anywhere – in private, hybrid, multi-cloud environments or at the edge. Zadara, with over 500 cloud locations worldwide, has collaborated with various organizations across different industries and meets market requirements and compliance for sovereign AI and traditional workloads with a pay-as-you-go model for expense control.

The partnership's highlights include:

- Flexible and scalable Compute-as-a-Service with trusted and robust protection against ransomware attacks ensuring business continuity.
- Storware Backup and Recovery offering businesses enhanced security, performance and ease of use leveraging seamless integration with Zadara.
- Transparent and flexible pricing models, enabling customers to optimize their costs.

At Zadara, we believe the future of cloud computing lies in AI-driven, and secure cloud solutions that adapt to evolving business needs. By partnering with Storware, we're ensuring that new customers gain enterprise-grade data protection, ransomware resilience, and the scalability to run their workloads with confidence across private, hybrid, and edge environments. We are excited to work with Storware and continue Zadara's mission of enabling innovative technologies and services that improve the way the world communicates, works, heals, travels and plays.

Kerry Telling

Vice President of Sales at Zadara

Storware and Zadara Join Forces to Deliver Secure and Scalable Compute-as-a-Service

” *The latest market trends, such as cost optimization, seamless scalability, and the growing demand for multi-cloud compatibility, indicate that customers need elastic solutions. Partnering with Zadara has provided the answer with high-level, protected environment regardless the location and capacity size. Storware Backup and Recovery provides Zadara users with the guarantee of data protection and ensures business continuity.*

Jan Sobieszczański
CEO of Storware

About Zadara

Zadara is a leading provider of sovereign AI edge clouds offering a revolutionary distributed cloud platform that simplifies operational complexity and enables seamless multi-tenancy through automated end-to-end provisioning of compute, storage, and networking. With over 500 edge cloud locations worldwide and with the ability to deploy a cloud in any location, Zadara's clouds are uniquely positioned to meet the unique demands of various cloud-based use cases, including sovereign cloud and AI inference at the edge for service providers and the modern enterprise. Zadara clouds are AWS compatible and feature consumption-based pricing with zero data egress fees.

Zadara's fully-managed clouds are designed to accommodate any workload, anywhere – whether on-premises, hybrid, multi-cloud or at the edge. Zadara operates worldwide with a highly skilled team that provides 24/7 follow-the-sun support and services. Zadara is headquartered in Irvine, California.

About Storware

Storware is a European vendor of an enterprise data backup and recovery system characterized by stability and excellent integration possibilities. It secures data of virtual machines, containers, and cloud environments, including Microsoft 365, applications, and storage providers. Moreover, Storware enables corporate data to be stored in multiple backup destinations, such as file systems and object storage, and can act as a proxy for enterprise backup providers. It offers support for the largest number of vendors on the market, both open and commercial. Storware successfully offers products through the worldwide distribution and partner channel. The Company was set up in 2013 in Warsaw, Poland.
