

# Storware Cloud

Simplified, Scalable, and Cost-Optimized Backup Storage as a Service

---

**Storware Cloud** is a flexible, tiered Storage as a Service (STaaS) destination for simple, affordable backup storage. Integrated with **Storware Backup and Recovery 7.4**, it helps you implement a reliable **3-2-1 backup strategy** while balancing performance, scalability, and cost.

Choose where your data lives, whether you need **ultra-fast access, deduplication, immutability, or long-term archiving** — Storware Cloud adapts to your needs.

It's perfectly matched with Storware Backup Appliances, including the new SBA 1010 — ready to go from day one.

## Why Storware Cloud?

- **No Infrastructure Hassle** – We manage the cloud, you focus on your data.
- **Cost Optimization** – Tiered storage means you only pay for what you use.
- **Performance Choice** – Three tiers powered by trusted partners:
  - **Tier 1** – N-able: High-performance, frequently accessed data.
  - **Tier 2** – Vawlt: Balanced for active + archive workloads.
  - **Tier 3** – Seagate: Secure, cost-efficient long-term retention.
- **Hybrid-Ready** – Combine on-prem SBA appliances with Storware Cloud for a stronger protection strategy.

## Key Features

- **Tiered Storage Options** – Match your data needs with the right storage class.
- **Scalable by Design** – Grow seamlessly as your storage demands increase.
- **Built-In Reliability** – Powered by leading providers (N-able, Vawlt, Seagate).
- **Data Protection Tools** – Deduplication, archiving, geolocation choice, and immutability.
- **Seamless Integration** – Works out of the box with Storware Backup Appliance.

## Secure. Scalable. Cost-Effective.

With Storware Cloud, protecting your data has never been easier. Experience the simplicity of a **tiered, cloud-based backup solution** that grows with your business — and ensures your data is safe, accessible, and cost-optimized.

**Start simplifying your backup today with Storware Cloud.**
