

Storware Backup and Recovery 7.1

Simplified Data Protection for Virtual, Physical,
and Multi-Cloud Infrastructures

In today's digital landscape, data is the heart of your business - but threats like cyberattacks, human errors, and unexpected disruptions are always looming. Storware Backup & Recovery 7.1 stands as your ultimate data defense, ensuring that your critical information remains safe and your business uninterrupted.

Unmatched Protection and Flexibility

Storware secures all your assets - virtual machines, containers, cloud environments, storage providers, endpoints, and Microsoft 365. Scale confidently with comprehensive protection that evolves with your business.

You don't have to choose. With one license you get support for:

• Modern Workloads

Simplify backup and snapshot management for virtual machines, containers, and beyond with agentless efficiency. Store data wherever you need it - local filesystems, cloud storage, or even tapes.

• Microsoft 365

Protect your Microsoft 365 suite, including Exchange Online, OneDrive for Business, Teams, and SharePoint Online. Automate user data protection, ensure compliance, and enjoy effortless file restoration.

• Windows, MacOS & Linux

Achieve granular file-level protection with OS Agents tailored for MacOS, Windows and Linux. Easily define your backup preferences, with support for full and incremental backups.

Engineered to Defend Against Any Threat:

• Scale Without Limits

Our multi-node architecture grows with your business, adapting to your unique needs.

• Fortress-Like Security

Benefit from robust security features like role-based access control (RBAC), encryption, and advanced ransomware protection.

• 24/7 Global Support

Our dedicated support network is always ready to assist, ensuring your data is protected around the clock.

• Open & Integrated

Seamlessly connect Storware with your existing tools through powerful APIs, enhancing your current workflows.

Engineered to Defend Against Any Threat:

• Effortless Management of Massive Datasets

Ensure business continuity with ransomware resilience and solid operational stability.

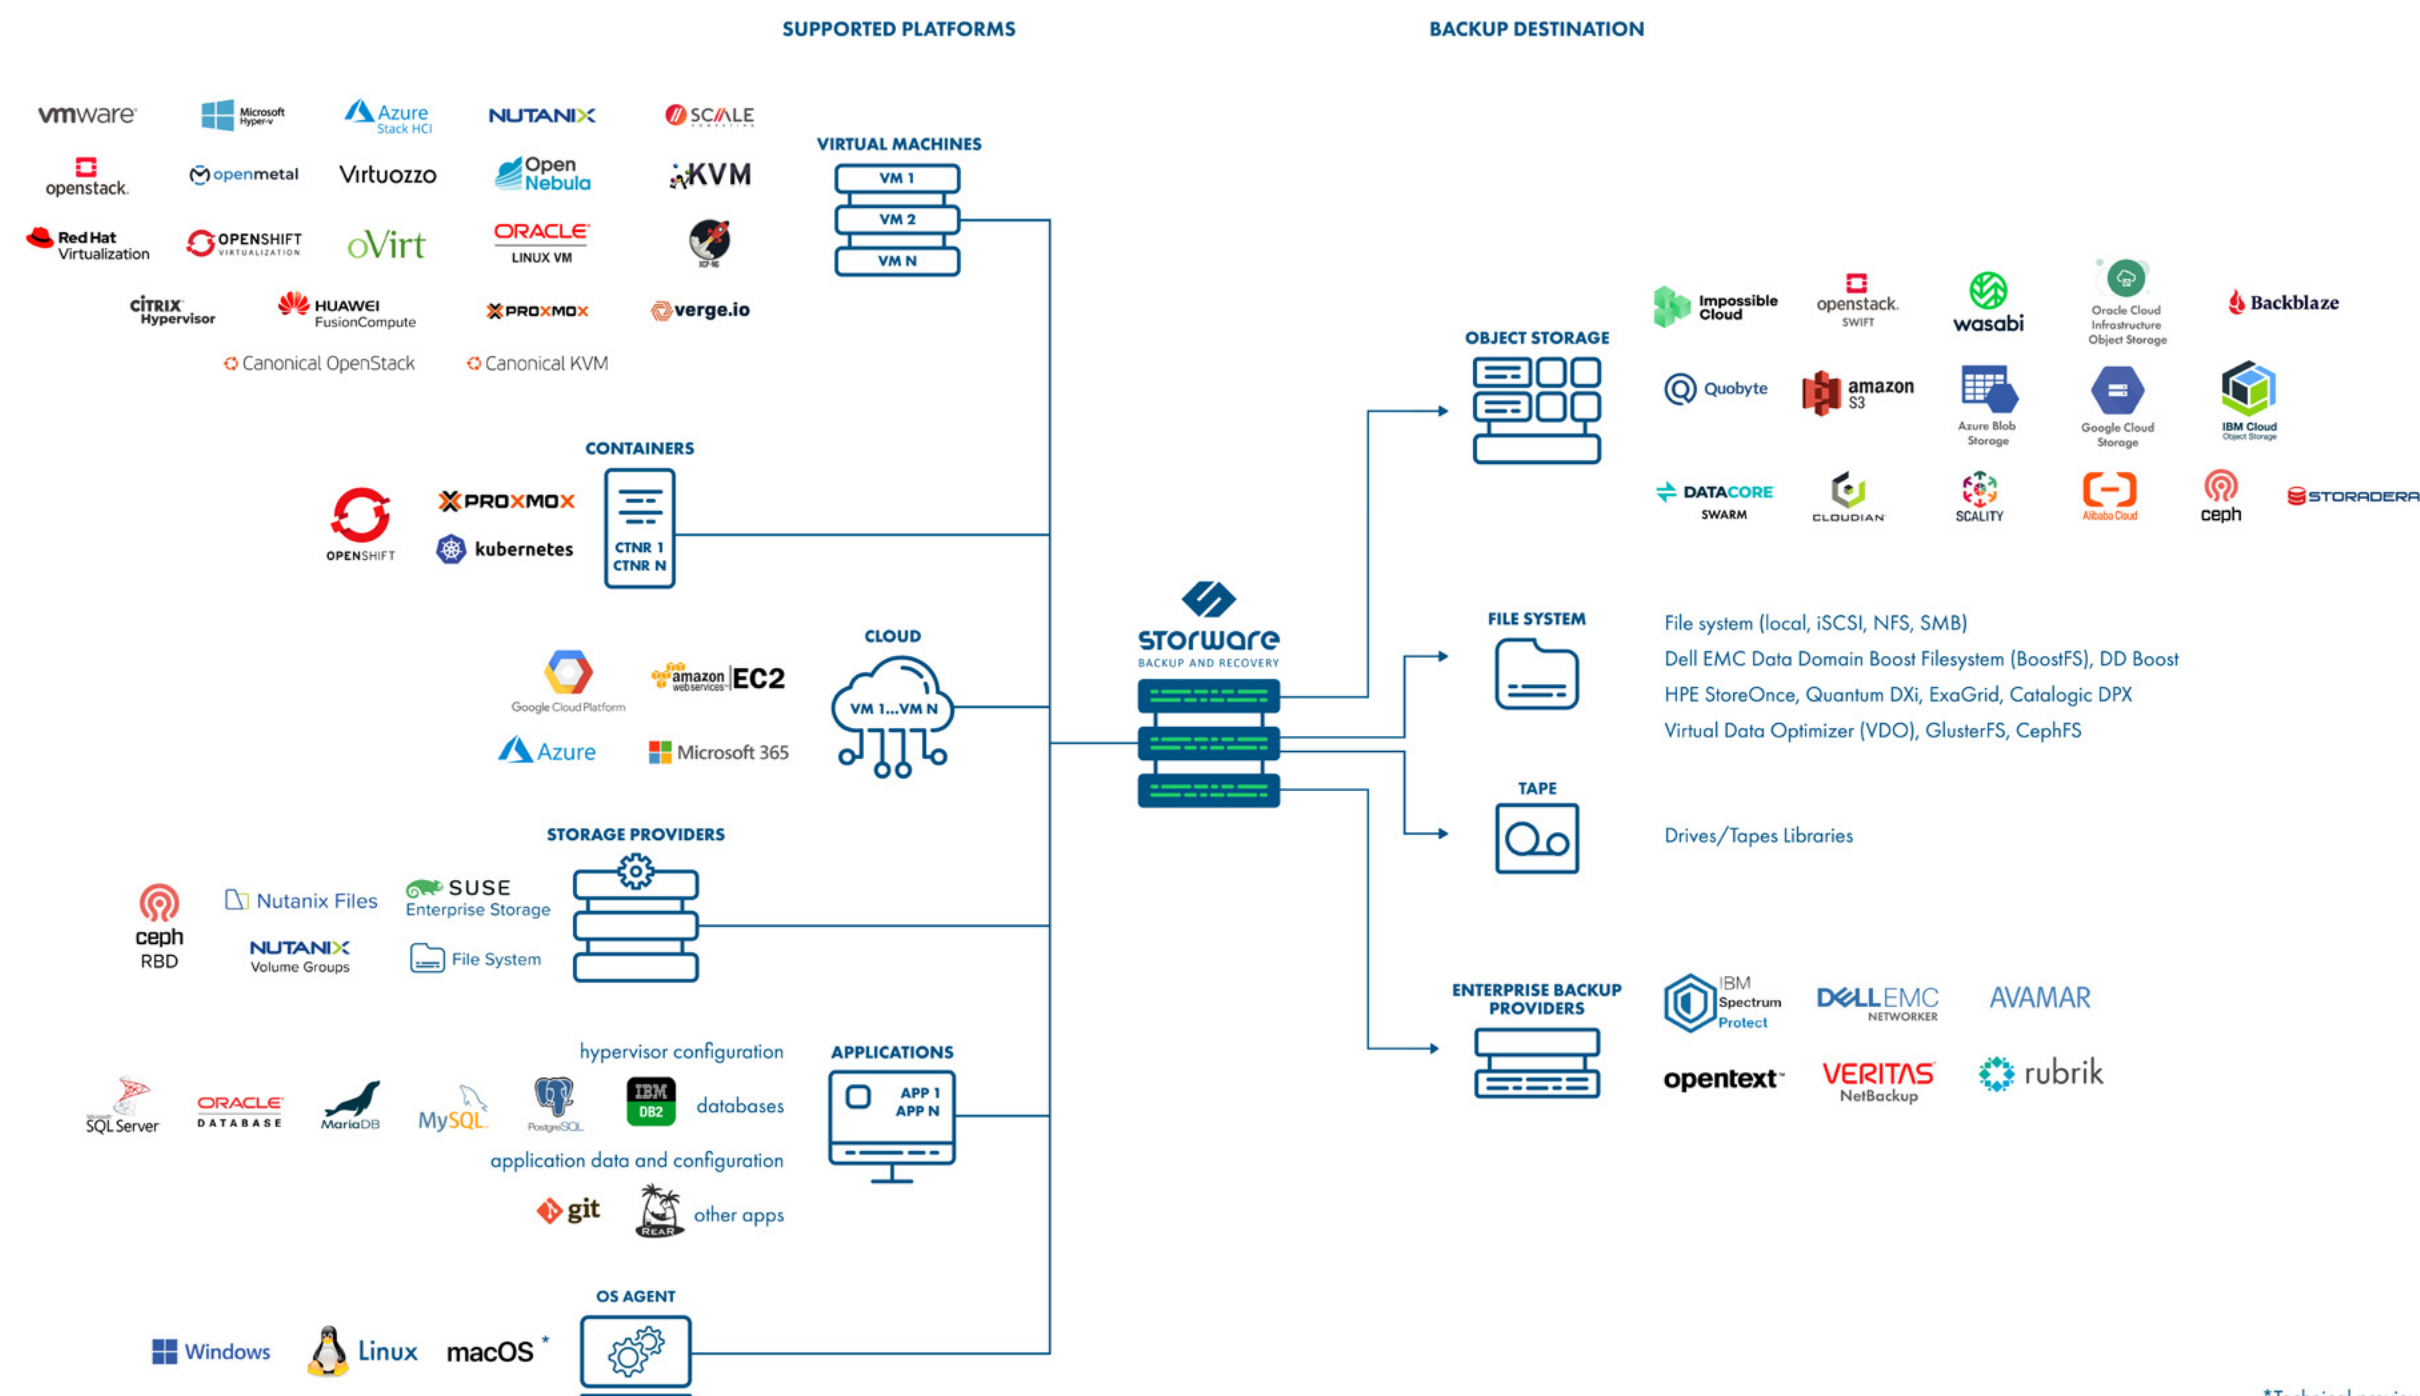

• Unrivalled Flexibility

Storware supports the widest range of platforms and backup destinations, all unified under one comprehensive license. Using v2v migration, it allows for seamless migration of vSphere virtual machines directly to OpenStack environments.

• Versatile Licensing Options

Choose the model that fits your needs - whether per-VM, per-host, or per-terabyte, with options for perpetual or subscription licensing.
