

Storware Backup and Recovery 7.2

Simplified Protection for Virtual, Physical and Cloud Data

One dashboard - one license - complete control for VMs, containers, cloud environments including Microsoft 365, storage providers, applications, and file-level backups for Windows, Linux and MacOS.

Storware Backup and Recovery 7.2

Simplified Protection for Virtual, Physical and Cloud Data

Storware Releases Backup and Recovery 7.2: Elevating Data Protection and Performance

This release introduces new features, optimizations, and improvements designed to enhance data protection, flexibility, and efficiency.

Key Highlights of Storware Backup and Recovery 7.2

- **Zadara zCompute Support (Technical Preview)**
We're expanding our ecosystem with technical preview support for Zadara zCompute, including generic incremental backup capabilities.
- **Backup Copy for OS Agent**
OS Agent backup policies now support secondary backup destinations, ensuring even greater data resilience.
- **ZFS Backup Destination Support**
Take advantage of ZFS deduplication and snapshot capabilities for efficient synthetic backup storage.
- **Optimized Tape Management**
Multiple improvements, including performance enhancements and reliability fixes, make tape handling smoother than ever.
- **Improved Reporting & Monitoring**
Grouped backup retries ensure only the final backup status is included in email reports and dashboards.

Storware Backup and Recovery 7.2

Simplified Protection for Virtual, Physical and Cloud Data

Key Highlights of Storware Backup and Recovery 7.2

- Improvements for cross-hypervisor restoration introduced in v7.1, enabling virtual machine (VM) restores between different hypervisor types, such as VMware vCenter/ESXi and OpenStack/Virtuozzo. Additionally, the new VM-to-VM (V2V) migration feature facilitates seamless migration of vSphere VMs directly into OpenStack environments, offering a straightforward path to consolidate and optimize multi-cloud infrastructures.

Storware Backup & Recovery 7.2 underscores our commitment to delivering cutting-edge data protection solutions that meet the evolving needs of our clients. By incorporating user feedback and focusing on innovation, this release ensures that organizations can safeguard their critical data with greater efficiency and confidence.

Storware Backup and Recovery 7.2

Simplified Protection for Virtual, Physical and Cloud Data

HIGHLIGHTS

Zadara zCompute
Support

Backup Copy
for OS Agent

Support for ZFS
backup destination

V2V migration
(VMware
to Openstack)

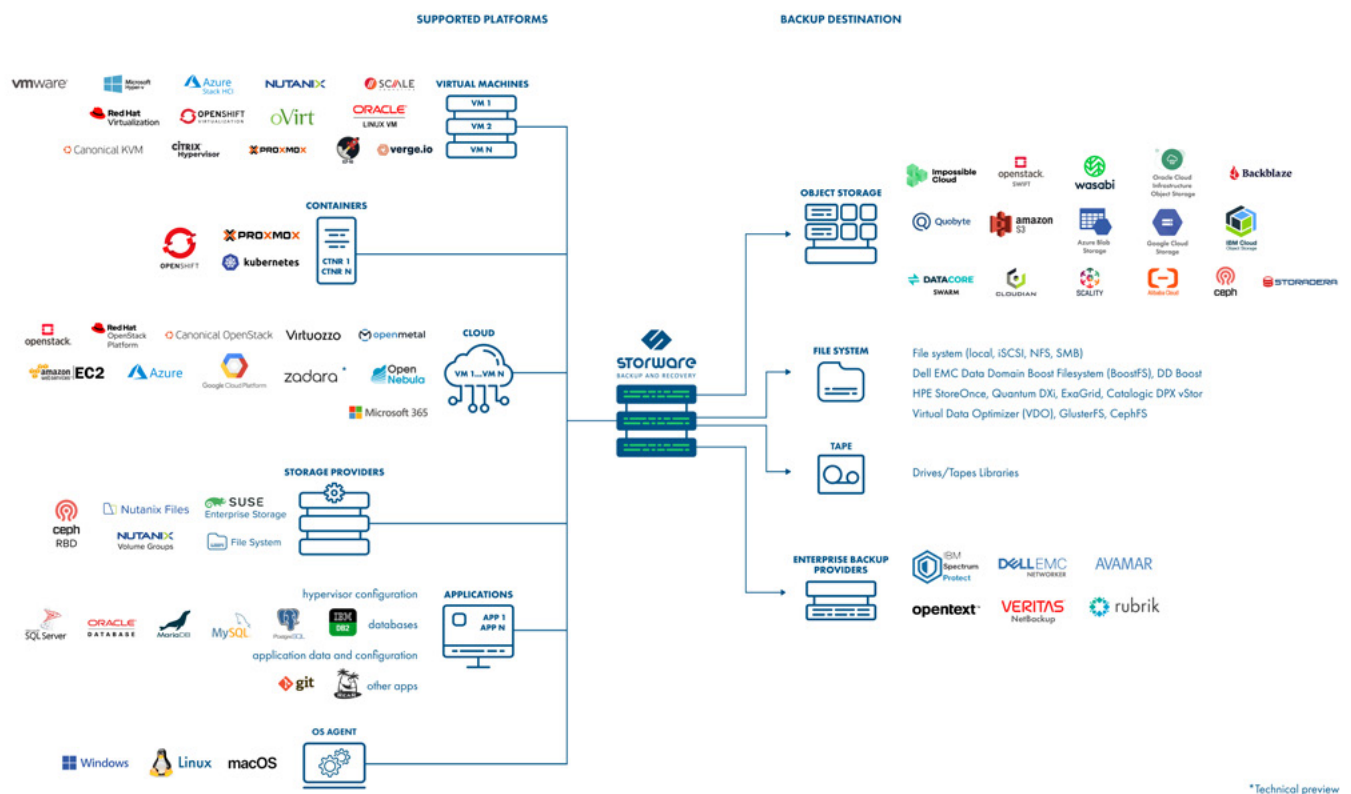

Detailed changes

- Zadara zCompute Support (technical preview)
- Backup copy for OS Agent
- Support for ZFS backup destination
- OpenStack - partial inventory sync API
- Reporting - group backup retries and report only final backup status in report email and dashboard
- Tapes - transfer performance improvements
- Tapes - multiple fixes related to tape handling
- Microsoft 365 - personal SPO sites disabled
- Cross-restore of virtual machines between different hypervisors types (V2V VMware to OpenStack)
